

Priority Project 1 – County Technology Council

Vision

Improve coordination and cooperation across the county regarding all technology decisions, including Broadband.

Mission

Develop a county wide technology council to coordinate and cooperate on technology decisions where it is deemed beneficial to do so.

Actions

- Identify representatives from each sector who will participate on the council.
- Schedule initial meetings to determine scope of the council.
- Inventory current technology resources being used by each sector.
- Determine current and potential synergies.
- Take steps to leverage synergies to improve operating efficiencies.

Measurement

To be determined during project planning –estimated completion 12/31/2009.

Timeline

To be determined during project planning –estimated completion 12/31/2009.
